THEY SAID IT

"Learning and education, along with cultivating top local and global talent, have always been the core of what Infosys brings to clients; it is what makes us a leader in times of great change. In helping our clients improve their businesses and pursue new kinds of opportunities, we are really excited to bring innovation and education in a fundamental and massive way to American workers," Infosys CEO Vishal Sikka said in the announcement.

This information is not to be construed as an offer to sell or a solicitation or an offer to buy the commodities herein named. The factual information of this report has been obtained from sources believed to be reliable, but is not necessarily all-inclusive and is not guaranteed as to the accuracy, and is not to be construed as representation by R.J O'Brien & Associates. "It's so good to welcome Infosys to Indiana, and to expand our growing tech ecosystem with the addition of their estimated 2,000 Hoosier jobs," Indiana Gov. Eric Holcomb said in the release.

<http://www.cnbc.com/2017/05/02/indian-outsourcing-firm-infosys-commits-to-creating-10000-us-jobs.html>

Infosys, India's iconic outsourcing firm, is also opening four new technology and innovation hubs across the U.S. that will train American workers in areas like cloud, artificial intelligence and big data. The first hub will launch in August 2017 in [Indiana](#), which alone will create 2,000 U.S. jobs by 2021.

"Reports of the death of retail real estate have been greatly exaggerated, and Kimco's strong first quarter is living proof," said Conor Flynn, CEO of Kimco Realty (NYSE: [KIM](#)). "Our leasing volume has validated the success of our transformation in helping to offset the challenging retail environment the industry is currently experiencing."

<http://www.costar.com/News/Article/Shopping-Center-REIT-Execs-Push-Back-Against-Negative-Fallout-from-Retailer-Bankruptcies/190686>

Retail REITs have been hitting back against the onslaught of negative retail headlines and analyst sentiments during the current round of quarterly earnings conference calls, with executives touting robust leasing, strong shopper foot traffic and occupancies, and even rising rental rates.

Simon Property Group Inc. Chairman and CEO David Simon said the company continues to see strong demand across its portfolio, with occupancy at the firm's mall and premium outlets standing at 95.6% at the end of the first quarter amid solid leasing activity. Simon's mall and outlet center retailers reported sales of \$615 per square foot, a 30-basis-point increase to the prior year period, and Simon said the average base minimum rent increased 4.4% from a year ago. "I just think the (negative) narrative is a way ahead of itself," Simon said. "Traffic is strong, it was up throughout our portfolio where we measure it, but you know at the end of the day, we've all got to have a better experience for the consumer because they're a tough nut to crack. We're frustrated only by the narrative, but not by what's happening in our business."

Republicans who eagerly awaited a GOP president so they could take a heavy knife to many of the regulatory requirements for banks, insurers and other financial institutions finally get their chance.

<http://www.cnbc.com/2017/05/02/gop-targets-law-enacted-after-2008-financial-meltdown.html>

The House Financial Services Committee, led by Texas Rep. [Jeb Hensarling](#), is slated to begin work Tuesday on legislation to largely undo the [Dodd-Frank](#) law, which Congress passed and Democratic President [Barack Obama](#) signed after the financial meltdown in 2008.

The GOP argues that the law hurts the economy by making it harder for consumers to get credit to buy a new house or a car, or for entrepreneurs to start or expand a small business. Hensarling has complained that banks are offering fewer credit cards and free checking accounts, while community banks report that compliance with Dodd-Frank's regulatory burdens make it harder to provide more mortgages.

This information is not to be construed as an offer to sell or a solicitation or an offer to buy the commodities herein named. The factual information of this report has been obtained from sources believed to be reliable, but is not necessarily all-inclusive and is not guaranteed as to the accuracy, and is not to be construed as representation by R.J O'Brien & Associates. President Donald Trump said [he is considering breaking up big banks](#), but former Wells Fargo chairman and CEO Richard Kovacevich thinks "it would be a mistake." Kovacevich said during CNBC's "[Closing Bell](#)" on Monday that history and, more recently, the latest financial crisis, show that adding regulations on banks and limiting their lending ability has not helped the U.S. economy and the average American.
<http://www.cnbc.com/2017/05/01/former-wells-fargo-ceo-says-breaking-up-big-banks-would-be-a-mistake.html>

"The key to safe and sound banking is diversity," Kovacevich added. "You can't depend on any one sector, and when you become concentrated you have a very high possibility of failing sometime in the future."

He added that "it's the worst thing [Trump] can do," and he hopes the president will reconsider. "The president has said things on many occasions that after thinking about it and getting input from others, decided to change those positions so this could be one of them," Kovacevich said. In the same meeting with community bankers where Trump suggested reinstating big bank regulations, he pledged to reduce regulations on community banks, according to Camden Fine, president and CEO of the Independent Community Bankers of America.

Trump does not unilaterally have power over deregulating community banks, however, and "it takes mostly congressional action," Fine noted in the joint CNBC interview on Monday.

"One of the good things is most community bank regulatory relief legislation is fairly bipartisan — and that helps us a long way, particularly in the Senate," Fine added.

Russian President Vladimir Putin and U.S. President Donald Trump will speak by phone on Tuesday, RIA news agency quoted Kremlin spokesman Dmitry Peskov as saying. Trump will speak with Putin on Tuesday at 12:30 p.m. EDT, the White House said on Monday night.

<http://www.reuters.com/article/us-usa-trump-putin-idUSKBN17Y03W>

A senior Trump administration official said the two leaders would likely discuss the civil war in Syria, where Moscow backs the government of Bashar al-Assad and the United States supports rebels trying to overthrow him.

Two [U.S. B-1B bombers](#) were deployed over the Korean Peninsula on Monday during a joint drill with [South Korea's](#) air force, South Korea's ministry said.

<http://www.cnbc.com/2017/05/01/s-korea-says-u-s-strategic-bombers-flew-over-korean-peninsula-in-joint-drill.html>

South Korean Defence Ministry spokesman Moon Sang-gyun told a briefing that the deployment of U.S. bombers was part of efforts to deter provocation by [North Korea](#) and respond to threats posed by the North's nuclear and missile programs. Moon did not give any further details.

In response, North Korea accused the United States on Tuesday of pushing the Korean peninsula to the brink of nuclear war after a pair of strategic U.S. bombers flew over the area in a training drill with the South Korean air force.

The two supersonic B-1B Lancer bombers were deployed amid rising tensions over North Korea's dogged pursuit of its nuclear and missile programs in defiance of United Nations sanctions and pressure from the United States.

The U.S. State Department issued a travel alert for Europe on Monday, saying U.S. citizens should be aware of a continued threat of terrorist attacks throughout the continent.

<http://www.reuters.com/article/us-usa-europe-alert-attacks-idUSKBN17X2CV>

This information is not to be construed as an offer to sell or a solicitation or an offer to buy the commodities herein named. The factual information of this report has been obtained from sources believed to be reliable, but is not necessarily all-inclusive and is not guaranteed as to the accuracy, and is not to be construed as representation by R.J O'Brien & Associates. In the alert, the State Department cited recent incidents in France, Russia, Sweden and the United Kingdom and said Islamic State and al Qaeda "have the ability to plan and execute terrorist attacks in Europe."

The State Department's previous travel alert for Europe, issued ahead of the winter holiday season, expired in February. A State Department official said Monday's alert was not prompted by a specific threat, but rather recognition of the continuing risk of attacks especially ahead of the summer holidays. The alert expires on Sept. 1.

U.K. manufacturing unexpectedly grew at the fastest pace in three years in April as the domestic market strengthened and the pound's depreciation boosted exports.

<https://www.bloomberg.com/news/articles/2017-05-02/u-k-manufacturing-growth-surges-to-fastest-in-three-years>

A measure of factory conditions rose to 57.3 from 54.2 in March, according to IHS Markit's Purchasing Managers' Index. That's far better than the 54 forecast by economists in a Bloomberg survey and above the 50 level dividing expansion from contraction. Growth in new orders and exports also gathered pace.

"Swift implementation of these commitments should enable the Eurogroup to endorse this agreement at its next meeting," European Commissioner for Economic Affairs Pierre Moscovici said in an emailed statement on Tuesday.

<https://www.bloomberg.com/news/articles/2017-05-02/greece-s-deal-with-creditors-paves-way-for-debt-relief-talks>

Seven years after Greece applied for outside aid, triggering a debt crisis that rippled across the euro area, the country remains heavily indebted and in need of bailout loans. In the latest standoff, Greece needs an installment of about 7 billion euros in aid to repay lenders in a few months, yet some euro-area governments, notably Germany, refuse to pay out until the IMF comes on board. The IMF has said it won't join the latest bailout program until Greece's debt burden is eased, in addition to the reforms agreed to earlier Tuesday.

"The discussion for an agreement that secures Greek debt's sustainability now begins," Greek Finance Minister Euclid Tsakalotos told reporters in Athens after the meeting with bailout auditors, which yielded the breakthrough.

The set of measures now agreed "should allow Greece to receive the funds it needs to stay afloat over the summer," said Holger Schmieding, chief economist at Berenberg Bank. "Both Greece and its creditors are de facto buying time before talks, including those on the details of debt relief, can advance after the German elections later this year."

The International Monetary Fund said its board has approved the disbursement of a second loan tranche to Moldova worth \$21.5 million.

<http://www.reuters.com/article/us-moldova-imf-idUSKBN17Y13V?il=0>

The IMF and the ex-Soviet country agreed in November a three-year loan program worth \$178.7 million, after negotiations had earlier been disrupted by a \$1 billion corruption scandal that plunged the country into turmoil.

The IMF praised measures taken by the Moldovan authorities since then to stabilize the economy, which is forecast to grow 4.5 percent in 2017.

Before dawn, a coal miner named Cameron Justice stopped at a gas station in Mingo County, West Virginia, grabbing two cans of Monster Energy drink before heading into the pits.

<https://www.bloomberg.com/news/articles/2017-05-02/in-u-s-coal-country-signing-bonuses-and-pay-raises-are-back>

He could use the jolt. The barrel-chested 37-year-old works six shifts a week at the Ruby Energy mine in the heart of U.S. coal country. Last year, he was lucky to get four.

“We’re booming,” Justice said. “This is the biggest upswing I’ve seen in five years. Everyone’s excited.”

Like a mountain stream reviving after a drought, money is trickling into Appalachia again -- at least, for now. It begins with a trio of global forces: Chinese production curbs, President Donald Trump’s anti-regulatory policies and investor bets that have, over the last year, doubled the market value of publicly traded U.S. coal companies, to \$15 billion.

It ends in cities like Logan, population 1,800, where streets that once bustled with small businesses are now blighted with shuttered stores, boarded-up windows and sidewalks laced with cracks.

The gossip here is no longer about mine closures and mass layoffs. Miners are snagging \$1,000 signing bonuses, fully paid health insurance and raises again. (Justice just earned a 50-cent-an-hour bump.)

In 2012, construction of a Georgia nuclear power plant stalled for eight months as engineers waited for the right signatures and paperwork needed to ship a section of the plant from a factory hundreds of miles away.

<http://www.reuters.com/article/us-toshiba-accounting-westinghouse-nucle-idUSKBN17Y0CQ>

The delay, which a nuclear specialist monitoring the construction said was longer than the time required to make the section, was emblematic of the problems that plagued Westinghouse Electric Co as it tried an ambitious new approach to building nuclear power plants.

The approach - building pre-fabricated sections of the plants before sending them to the construction sites for assembly - was supposed to revolutionize the industry by making it cheaper and safer to build nuclear plants.

But Westinghouse miscalculated the time it would take, and the possible pitfalls involved, in rolling out its innovative AP1000 nuclear plants, according to a close examination by Reuters of the projects.

Those problems have led to an estimated \$13 billion in cost overruns and left in doubt the future of the two plants, the one in Georgia and another in South Carolina.

Pass-Throughs? AMT? Here Are the Tax-Reform Terms You Need to Know

(Bloomberg Intelligence) -- 04/24/17

Truckstop.com Market Demand Index, Average Rates DataChart

(Bloomberg Intelligence) --Relative North American spot trucking demand fell 0.5% sequentially to 26.7 in the week ended April 28, as measured by Truckstop.com's Market Demand Index. Capacity loosened as the 3.4% gain in truck availability outpaced the 2.9% increase in available loads. Despite more slack capacity, average spot pricing increased 0.7%, led by flatbed and reefer (each up 0.9%), while specialized (down 2%) was the only equipment type to decline. Fuel surcharges inched slightly higher sequentially (up 0.1%).

The Market Demand Index has climbed 95% from last year. Total rates increased by 9%, driven by 38% higher fuel surcharges. USA Truck and Knight are the truckload carriers most exposed to the spot market. Swift, Werner, J.B. Hunt and Marten have little exposure.

ATLANTA FED GDPNow 0.2 percent — April 27, 2017

The final GDPNow model forecast for real GDP growth (seasonally adjusted annual rate) in the first quarter of 2017 is **0.2 percent** on April 27, down from 0.5 percent on April 18. The forecast of first-quarter real consumer spending growth fell from 0.3 percent to 0.1 percent after yesterday's annual retail trade revision by the U.S. Census Bureau. The forecast of the contribution of inventory investment to first-quarter growth declined from -0.76 percentage points to -1.11 percentage points after this morning's advance reports on durable manufacturing and wholesale and retail inventories from the Census Bureau. The forecast of real equipment investment growth increased from 5.5 percent to 6.6 percent after the durable manufacturing report and the incorporation of previously published data on light truck sales to businesses from the U.S. Bureau of Economic Analysis.

The next GDPNow update is **Monday, May 1**. Please see the "Release Dates" tab below for a full list of upcoming releases.

NY Fed Nowcast April 21, 2017: Highlights

The FRBNY Staff Nowcast stands at 2.7% for 2017:Q1 and 2.1% for 2017:Q2.

Mixed news from this week's data releases left the nowcast for Q1 and Q2 essentially unchanged.

Negative surprises from the Empire State Manufacturing Survey and housing starts offset positive surprises from industrial production, capacity utilization, and building permits.

St. Louis Fed Agriculture Finance Monitor 4th quarter

According to the latest survey of agricultural bankers in the Eighth Federal Reserve District, fourth-quarter farm income declined from the previous year, continuing the downward trend reported in the past several surveys. Lower incomes continue to push down farmers' household and capital spending. Bankers also reported that agricultural land values and cash rents moved in tandem with farm income in the fourth quarter, with values and rents falling from the previous year for quality farmland and ranch or pastureland. Regarding bank-related activities, a majority of bankers reported that fourth quarter demand for loans and availability of funds were up relative to the fourth quarter of 2015, while the average rate of loan repayment was down. Our three special questions focused on farmland sales. Results show most bankers believe the volume of farmland sales in 2017 will be unchanged from the previous year. Regarding 2016 sales, 69 percent of bankers reported that farmers purchased more than half the farmland sold in their area. Responses to the question of what interest rate on fixed-rate farm real estate loans would cause the volume of farmland sales to decline were relatively evenly distributed among response options, which ranged from a "5.5 to 6 percent" bin to a "more than 7 percent" bin.
